Overview: The Earth Alliance's standard mobile weapon prior to the introduction of the GAT-01 Strike Dagger. Its name is an acronym for MOBILE Interdictor Unit/Striker. The Mobius is cheap and easy to manufacture, as well as being faster and more agile than the GINN by far, but none too durable and vastly inferior. However, it kept the Alliance within shouting distance until the Strike Dagger could be developed and deployed. The Mobius is presently relegated to colony guard and other relatively inessential duties.

Ace pilot Lt. Mwu La Fllaga piloted a custom mobile armor, the TS-MA02.mod00 Mobius Zero, which bore little resemblance to the original Mobius. Fllaga's orange mobile armor turned the tide in many early battles, including the one where he earned his nickname, the Falcon of Endymion.

Above Table Notes: For games taking place during the first year of the Bloody Valentine War (before Phase-37: *Thunder of God*), the Mobius is the only mobile weapon available to Alliance forces. After Phase-37, the Mobius is virtually unseen.
